

Review of Greenhouse Effect

2022-02-02

Contents

Reading: 1

Reading:

No new reading for today.

Notes:

As you prepare for class, think about:

- What makes some greenhouse gases more powerful than others?
- What are the important differences between the layer-model approach to calculating temperature and the skin-model on pp. 45–46?
- How does band saturation work? How can you recognize saturation in MODTRAN?
- How do you use MODTRAN to calculate the effect of doubling CO₂?
- How do you use the full-spectrum model to calculate the effect of doubling CO₂?
